

AXXE® Broad Spectrum Herbicide

Burndown for Broadleaf Weeds and Grasses

AXXE Broad Spectrum Herbicide is the ideal solution for landscape/grounds professionals with customers who want sustainable or reduced-risk broadleaf weed, grass, and liverwort control.

Use as a vegetative burndown, preemergence spray, or spot control with directed/shielded sprays for walkways, driveways, parking areas, and around buildings or structures.

ACTIVE INGREDIENT:
Ammonium Nonanoate..... **40.00%**
OTHER INGREDIENTS..... 60.00%
TOTAL..... 100.00%

AXXE Broad Spectrum Herbicide contains 3.3 lbs. of ammonium nonanoate per US gallon.

WEEDS AND GRASSES CONTROLLED

Crabgrass, bentgrass, fescue, pigweed, amaranth, carpetweed, liverwort, dandelion, ragweed, moss, oxalis, moneywort, nutsedge, and more

KEY FEATURES & BENEFITS

- Rapid burndown, results within 24 hours
- Does not volatilize or translocate
- No harmful residues, no known resistance
- Tank-mix with other herbicides to improve their efficacy

MODE OF ACTION

AXXE Broad Spectrum Herbicide penetrates the cell walls of undesirable plants to disrupt cellular functions. Plant growth ceases when cellular contents are mixed which causes brown necrotic plant tissue.

APPLICATION NOTES

- Thorough coverage is extremely important.
- Works best during warm and dry conditions, but is not temperature dependent.

24 hours after AXXE Broad Spectrum Herbicide (left) and organic alternative (right).

INSECT CONTROL*

AXXE Broad Spectrum Herbicide is used for the control of adelgids, aphids, earwigs, grasshoppers, lacebugs, mites, plantbugs, psyllids, sawfly larvae, scales, tent caterpillars, thrips, whiteflies, and woolly aphids.

Apply when insects first appear and are in their early larval stages. Repeat applications every 7 days or as needed.

Before (left) and after (right) AXXE Broad Spectrum Herbicide application.
